

# Australian Builders

## DRY SAND

**Australian Builders** dry sand is washed and drying according Australian standards. Dry sand is made in Australia and is ideally suited for many building, construction, home maintenance, garden and renovation applications.

### APPLICATIONS

**Australian builders dry sand can be used in several applications including following:**

- Suitable for mortar, concrete, render and grout mixes
- Agricultural purposes
- Landscape projects
- Backfill applications
- Grease traps
- Hobby modelling
- Potting mix blends
- Renders
- Artificial turf

### DIRECTION TO USE DRY SAND IN MORTAR/RENDER

- When using the sand to produce mortar/renders. Empty contents into wheelbarrow or onto a smooth non-porous clean surface.
- Mix thoroughly using the least amount of water to obtain the correct workability.
- Use the mortar or render mix immediately after mixing.
- Always compact your mortar mix thoroughly.
- Make sure mortar is cured properly. (it is recommended to use 7day moist curing for maximum performance)
- Do not add excess water into the mortar mix.

### HANDLING AND STORAGE

Australian Builders dry sand should be stored in a dry place.
