

Australian Builders

Quick Set Mortar

Australian Builders Mortar Mix is a premium well-proportioned mix of general-purpose cement, graded sand hydrated lime and selective additives.

APPLICATIONS

Quick set mortar is designed to be used as a fast setting mortar for external and internal applications.

Australian builders quick set mortar mix is ideal for the following applications

- Grouting
- Patching
- Temporary repairs to concrete
- Temporary repairs to concrete pipes
- Temporary sealing of water leaks

PROPERTIES OF AUSTRALIAN BUILDERS MORTAR MIX

The table below shows the typical properties of Australian Builders mortar mix.

Approximate mix composition (parts by volume)	
Cement	1
Sand	5
Additive	<0.1
Set times	
Initial setting (mins)	<15
Final setting (mins)	>25
Compressive Strength of Mortar (MPa)	
7 day (MPa)	>5
28 day (MPa)	>10

DIRECTION TO USE

- Place the required quantity of dry mix into a wheelbarrow or onto a hard-non-absorbent surface.
- Do not mix more than that can be used within 10-15 mins.
- As a guide, add approximately 3.3 litres of clean water for 20 kg mortar mix.
- Mix thoroughly.
- Add water gradually until plastic, consistent and workable mix is formed.
- Makes sure the surfaces are free from dirt, dust, loose particles before mortar is used.
- Use the wet mortar immediately after mixing.
- Clean tools and equipment immediately after use.

YIELD

Approximately 90 bags of 20 kg quick set mortar are enough to produce 1m³ of mortar.

HANDLING AND STORAGE

Manual handling of bag products without due care and attention may result in personal injury. Unless you have been trained in manual handling methods. It is suggested that you share the load with another person.

Australian Builders quick set mortar mix can be stored up to six months provided it is stored in a place dry place which is protected from ingress of moisture.
